

Coding & Solution

Date	9 JULY 2026
Team ID	-
Project Name	AI Powered Debt Relief & Financial Recovery Platform
Maximum Marks	5 Marks

Coding & Solution

This section evaluates the quality and completeness of your implemented code and the overall solution. Your submission should demonstrate working functionality, clean code practices, and alignment with your defined requirements.

Instructions:

1. Ensure your code is well-structured, commented, and follows best practices for your chosen technology stack.
2. The solution should address the core problem statement and implement the key functional requirements.
3. Include all source files, configuration files, and setup instructions needed to run the application.
4. Attach or link to your code repository (e.g., GitHub) in the table below.

Solution Summary

Field	Details
Repository Link / URL	https://github.com/bhumikapandiri36/AI-Powered-Debt-Relief-Financial-Recovery-Platform/tree/main
Programming Language(s)	Python, HTML, CSS, JavaScript, SQL
Framework(s) Used	Flask, Scikit-learn, Bootstrap

Key Features Implemented	• User Registration & Login • Loan Management • Expense & Income Tracking • AI-based Debt Analysis • EMI Reminder System • Personalized Repayment Plan • Financial Dashboard
Pending / Incomplete Features	• SMS Notifications • Multi-language Support • Mobile Application • Bank API Integration
Setup / Run Instructions	1. Install Python and required libraries. 2. Install Flask and Scikit-learn. 3. Import the MySQL database. 4. Run app.py. 5. Open http://localhost:5000 in the browser.

Code Quality Checklist

S.No	Criteria	Status (Yes / No)
1	Code is modular and organized into functions / classes	yes
2	Meaningful variable and function names are used	yes
3	Code includes comments / documentation where necessary	yes
4	Error handling is implemented for critical operations	yes
5	The application runs without critical errors	yes
6	Code is committed to a version control repository	yes

Additional Notes / Comments:

The project is developed using Python, Flask, Machine Learning, and MySQL. It provides AI-powered debt analysis, EMI reminders, expense tracking, and personalized repayment recommendations. The code is modular, readable, and follows standard coding practices.
